München/Munich

Exact location of Rohde & Schwarz

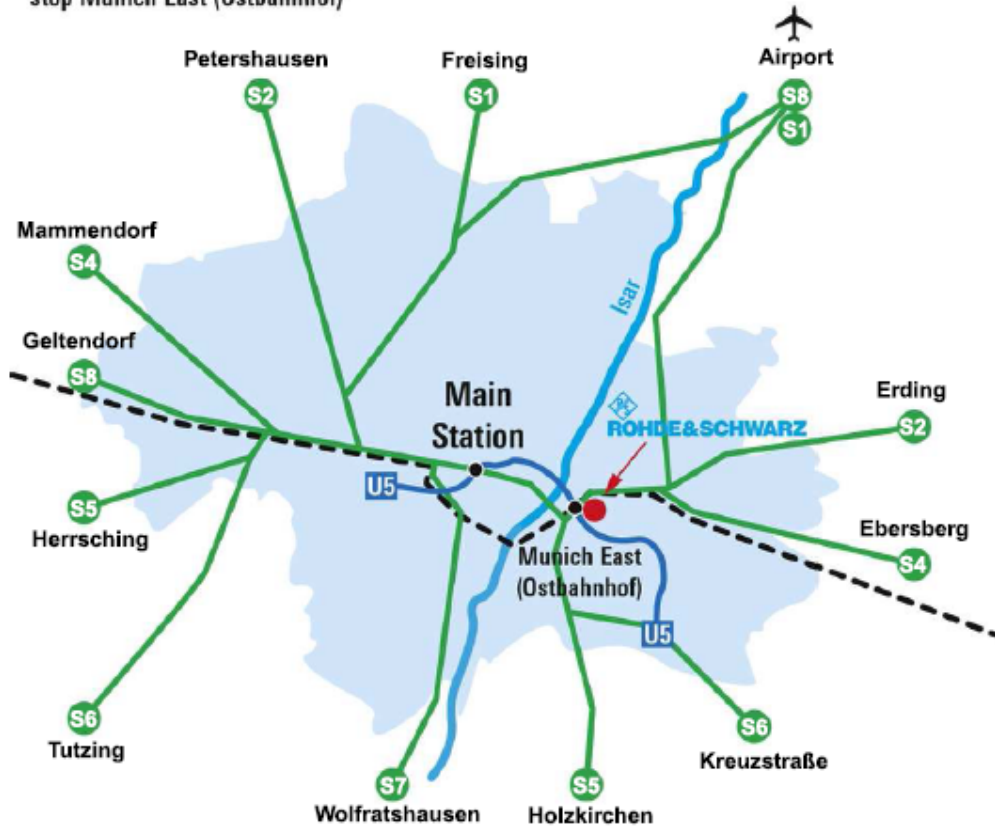

München/Munich

Arrival by car

München/Munich

Arrival by train, **S**uburban or **U**nderground train, stop Munich East (Ostbahnhof)

Call for Presentations

We are putting together an interesting agenda that will include presentations and discussions on important developments in the HF industry. The HFIA facilitates:

- The introduction of new technical concepts and approaches to the HF community which might solve communication problems.
- A forum for government to brief industry on standards, interoperability, and program related activities
- A forum for industry to air views on standards, current and forthcoming technology, and interoperability concerns
- A mechanism to allow industry to directly contribute to standards development
- Recommendations and positions by industry to government on standards related issues e.g. ITU World Radio Conferences, etc.

We are currently looking for presenters for these subjects and any related topic you may want to offer to fill the agenda. If you have an HFIA presentation that you would like to give or equipment that you would like to demonstrate, send Bruno Haineault (HFIA Chairman) or David Arcoraci (HFIA Secretary) a short E-mail to ensure it is placed on the agenda.

September 14th will be upon us quickly, so please take time to consider giving a presentation.

HFIA Website

Additional information about HFIA and ICM, including past meeting agendas, attendance lists, and presentations can be found on the HFIA website at <http://www.hfindustry.com> . Watch this web site for periodic updates on agenda items for the upcoming meetings.
